Remote Sensing and Biodiversity Monitoring Working Group

Clive Hurford, September 2025

The key aim of the Working Group is

- To facilitate information exchange between remote sensing technicians and land managers responsible for delivering biodiversity management and monitoring

Other goals are to:

- Provide links to relevant online training videos, webinars, manuals, articles and case studies on a Eurosite Resource Centre
- Create the possibility for personal consultations, as necessary; and
- Enable social network interactions, e.g., through Eurosite online media and events

The working group currently involves participants from 14 European countries
